ANDREAS KURNIAWAN

FULLSTACK DEVELOPER

contact.andreaskurniawan@gmail.com | <u>LinkedIn</u> | <u>Portfolio</u> | <u>Github</u>

Bekasi, Indonesia

SUMMARY

Fullstack Developer specializing in Next.js, React and Node.js. I have delivered 4+ client projects generating over IDR 1,000,000,000 in a single year, leading technical teams and building high-impact products including a custom dashboard-builder, social-media monitoring app, and integrated landing pages with payment and analytics. I accelerate team productivity through reusable scaffolds (reducing setup from 1 day to 2 hours), design systems and CI/CD pipelines, while mentoring developers, running biweekly tech talks, and delivering clear technical documentation to align solutions with business needs.

WORK EXPERIENCE

<u>Frontend Developer, Rolling Glory Beta</u>   **Jan 2025 - Present**

- Led frontend development with React / Next.js / Vue, integrating with backends to deliver responsive, high-performance web apps.
- Built and maintained cross-platform mobile apps using React Native (iOS & Android).
- Created and mantain a reusable starter/scaffold that cut new-feature setup from 1 day to 2 hours, boosting developer velocity.
- Ran biweekly tech talks (rotating presenters) to research and share emerging technologies and best practices.
- Mentored frontend team members. shaping direction, resolving issues, supporting growth, and communicating management updates.
- Actively researched company and project requirements to align technical solutions with business needs.
- Documented research findings and delivered clear reports with actionable recommendations to stakeholders.

<u>Fullstack Developer, BigBox - Telkom Indonesia</u>   **Feb 2022 - Dec 2024**

- Delivered 4+ client projects with repeat orders, generating over IDR 1,000,000,000 in project value in a single year.
- Led a small technical team (1 frontend, 1 backend), owning architecture, delivery plans, code reviews, and client demos to ensure on-time, high-quality releases.
- Designed and built a custom dashboard-builder for data visualization and reporting, enabling stakeholders to create ad-hoc reports and access near-real-time insights.
- Developed a social-media monitoring application to aggregate trends and engagement metrics, supplying marketing and product teams with actionable analytics.
- Rebuilt and launched a client-facing landing site as full-stack developer: redesigned UX/UI, optimized performance, implemented payment flow and analytics tracking, and integrated with third-party systems.
- Created digital product showcase pages and demos for company events and sales, improving brand visibility and supporting business development.
- Authored and published a private design system (component library + documentation) in GitLab, standardizing UI patterns and speeding up frontend delivery.

EDUCATIONS

Fazztrack : Fullstack developer bootcamp   **2021**

Completed intensive 3-month bootcamp focused on modern fullstack development. Built multiple production-style projects including ticket booking systems, e-commerce platforms, worker hiring apps and e-wallet solutions. Applying best practices in UI/UX, API integration, authentication and database design while strengthening collaboration and problem-solving skills in team environments.

SMK N 1 Sukoharjo   **2017 - 2019**

Specialized in computer systems and network administration. Studied hardware installation, software configuration, network architecture, troubleshooting and system maintenance. Building foundational technical skills in IT infrastructure and problem-solving.

TECHNICAL SKILLS

Frontend Development
- Next
- React
- React Native
- Tanstack Start
- Vue
- Flutter
- Laravel
- Flask
- Remix
- Angular

Backend Development
- ExpressJS
- NestJS
- GO
- Laravel
- Flask
- Code Igniter
- Django

Database
- PostgreSQL
- MySQL
- Solr
- MongoDB

INFRASTRUCTURE & DEVOPS

- Docker & Docker Compose
- Home server / self-hosting
- Linux administration
- CI/CD

LIBRARIES

Testing & Quality Assurance
- jest
- @testing-library/react
- supertest

ADDITIONAL TOOLS
- Jira
- Trello
- Notion
- Figma
- Photoshop
- Corel Draw
- Blender

Development Tools
- Docker
- eslint
- prettier
- cross-env
- typescript
